EDUCATION

Drexel University | College of Computing & Informatics

Philadelphia, PA

B.S. Computer Science | Minor in Mathematics CGPA: 3.81 / 4.0

September 2019 – June 2024

WORK EXPERIENCE

Revenue Healthcare Services

Chicago, IL

Business Analyst (Product)

September 2024 – Present

- Executed comprehensive business requirements gathering through interviews with 30+ healthcare providers to identify pain points, and translated the business needs into functional specifications for the development team
- Led the development and launch of an automated claim scrubbing and validation workflow using SQL and Power BI, reducing claim denial rates by 20% and improving reimbursement timelines for healthcare providers
- Defined, tracked, and reported performance metrics and OKRs for product features using Agile practices and Jira dashboards, supporting iterative improvements and data-driven prioritization
- Facilitated cross-functional collaboration between product, engineering, and operations teams, ensuring shared understanding of requirements and delivering end-user training sessions post-deployment

Chubb Limited

Philadelphia, PA

Software Product Analyst Co-op

April 2023 – September 2023

- Coordinated with cross-functional stakeholders to identify business requirements related to audit integrity and compliance, translating findings into actionable software solutions
- Designed and deployed classification and regression models using Python (Scikit-Learn), reducing audit discrepancies caused by data inconsistencies by 30% in two months
- Performed process analysis and workflow optimization using value stream mapping and root cause analysis across engineering and operations teams, reducing audit cycle time by 15% and enhancing cross-functional decision-making agility
- Enabled knowledge transfer and delivered insights through stakeholder presentations, enhancing transparency and aligning data-driven solutions with organizational goals

Day & Zimmermann

Philadelphia, PA

Technical Product Management Co-op

April 2022 – September 2022

- Automated synchronization between ticketing and SAP systems via Python and ABAP-based API integration, reducing manual data entry errors by 40% and enhancing operational accuracy, as validated by daily operational logs
- Streamlined IT support workflows by documenting integration requirements in Confluence and managing end-to-end API-driven system integrations, decreasing issue resolution times by 25% and ensuring alignment with stakeholder needs
- Created process flow diagrams in Microsoft Visio to model existing and future-state workflows, enabling clearer communication between technical teams and business stakeholders

NetSol Technologies Inc.

Calabasas, CA

UI/UX Designer Co-op

April 2021 – September 2021

- Directed a team of five developers to design and implement an enhanced user interface using HTML, CSS Tailwind, and Three.js, leading to improved user satisfaction and positive feedback
- Conducted a detailed analysis of user engagement metrics using Google Analytics and SQL, driving a strategic UI/UX overhaul that resulted in a 5% increase in site accessibility and 50% rise in user retention
- Leveraged Power BI to analyze user feedback trends, providing data-driven insights for a 10% improvement in user satisfaction

PROJECTS

Capstone Project: Dynamic Pricing System | [GitHub](#)

September 2023 – June 2024

- Led the end-to-end development of a pricing system to optimize revenue by 20% for local convenience stores through real-time price adjustments based on demand elasticity
- Constructed a serverless AWS infrastructure with EC2, RDS, and Lambda to enhance scalability and data handling
- Formulated RESTful APIs to enable seamless real-time pricing updates, reducing latency and ensuring immediate responsiveness
- Incorporated machine learning algorithms in Python to create adaptive pricing models, leveraging elasticity and market trends to enhance decision-making and profitability
- Established a robust CI/CD pipeline, enabling efficient and reliable production-ready software updates

SKILLS

- **Languages:** Java, Python, JavaScript, SQL, TypeScript
- **Frameworks:** React.js, Next.js, Node.js, Flask, Express.js, Spring, Django, RESTful APIs
- **Developer Tools & Platforms:** AWS, Azure, Git, Power BI, Docker, Kubernetes, Linux, Tableau, Visio, Apache, Excel
- **Project Management & Workflow:** Agile methodologies (Scrum, Kanban), Jira, Confluence, Notion, Trello, FigJam

AWARDS & ACHIEVEMENTS

- **Drexel Founder's Scholarship** – Merit scholarship to study at Drexel University September 2019 – June 2024
- **President's List** – Drexel University, College of Computing and Informatics Fall 2023 – Spring 2024
- **Dean's List** – Drexel University, College of Computing and Informatics Fall 2022 – Winter 2023
