EDUCATION

Drexel University | College of Computing & Informatics

Philadelphia, PA

B.S. Computer Science | Minor in Mathematics

CGPA: 3.81 / 4.0

September 2019 – June 2024

WORK EXPERIENCE

Revenue Healthcare Services

Chicago, IL

Associate Product Manager

September 2024 – Present

- Led the development and launch of an automated claim scrubbing and validation workflow, reducing claim denial rates by 20% and improving reimbursement timelines for healthcare providers
- Executed user interviews with 30+ healthcare providers to identify pain points, leading to the creation of a dashboard that consolidated billing metrics, reducing report generation time by 40%
- Developed and prioritized a feature road map based on customer feedback and industry trends, introducing an eligibility verification feature that reduced manual processing efforts by 25%
- Defined KPIs and spearheaded A/B testing for a payment reminder feature, boosting patient payment collection rates by 12% and increasing overall platform engagement

Chubb Limited

Philadelphia, PA

Software Management Co-op

April 2023 – September 2023

- Designed and deployed classification and regression models using Python's Scikit-Learn library, reducing audit discrepancies from data inconsistencies by 30% in two months, and enhancing the audit review process
- Optimized data workflows across engineering and operations teams, reducing audit cycle time by 15%, enabling faster decision-making, and improving alignment between stakeholders
- Managed the design and launch of a predictive risk assessment framework, successfully identifying critical vulnerabilities and mitigating operational risks by 70%
- Architected an unsupervised anomaly detection system using TensorFlow, improving compliance breach detection accuracy by 18% and ensuring robust system performance

Day & Zimmermann

Philadelphia, PA

Technical Product Management Co-op

April 2022 – September 2022

- Automated synchronization between ticketing and SAP systems through Python and ABAP-based API integration, reducing manual data entry errors by 40% and improving operational accuracy, as verified by daily operational logs
- Streamlined IT support processes by leading API-driven integrations with external systems, reducing issue resolution times by 25% and delivering actionable solutions to stakeholders to ensure system integrity and alignment with business goals
- Supervised the implementation of Python scripts to automate user query response systems, resulting in a 60% reduction in response times and a 35% increase in customer satisfaction through efficient query handling

NetSol Technologies Inc.

Calabasas, CA

UI/UX Designer Co-op

April 2021 – September 2021

- Directed a team of five developers to design and implement an enhanced user interface using HTML, CSS Tailwind, and Three.js, leading to improved user satisfaction and positive feedback
- Conducted a detailed analysis of user engagement metrics using Google Analytics and SQL, driving a strategic UI/UX overhaul that resulted in a 5% increase in site accessibility and 50% rise in user retention
- Leveraged Power BI to analyze user feedback trends, providing data-driven insights for a 10% improvement in user satisfaction

PROJECTS

Capstone Project: Dynamic Pricing System | [GitHub](#)

September 2023 – June 2024

- Led the end-to-end development of a pricing system to optimize revenue by 20% for local convenience stores through real-time price adjustments based on demand elasticity
- Constructed a serverless AWS infrastructure with EC2, RDS, and Lambda to enhance scalability and data handling
- Formulated RESTful APIs to enable seamless real-time pricing updates, reducing latency and ensuring immediate responsiveness
- Incorporated machine learning algorithms in Python to create adaptive pricing models, leveraging elasticity and market trends to enhance decision-making and profitability
- Established a robust CI/CD pipeline, enabling efficient and reliable production-ready software updates

TECHNICAL SKILLS

- Languages:** Java, Python, JavaScript, SQL, TypeScript, HTML, CSS
- Frameworks:** React.js, Next.js, Node.js, Flask, Express.js, Spring, Django, RESTful APIs
- Developer Tools & Platforms:** AWS, Azure, Git, Power BI, Docker, Kubernetes, Linux, Tableau, Visio, Apache, Excel
- Project Management & Workflow:** Agile methodologies (Scrum, Kanban), Jira, Notion, Trello

AWARDS & ACHIEVEMENTS

- Drexel Founder's Scholarship** – Merit scholarship to study at Drexel University September 2019 – June 2024
- President's List** – Drexel University, College of Computing and Informatics Fall 2023 – Spring 2024
- Dean's List** – Drexel University, College of Computing and Informatics Fall 2022 – Winter 2023
